

AMP25W

25W RF Amplifier

AMP25W - High quality built & tested 25W amplifier

This 25W FM amplifier was built to produce excellent no-tune operation, while keeping low price and easy of use: just connect the output to an fm antenna, and the input to any 1W exciter, we recommend to connect to our TX180A - FM modulator which drive this amplifier to 25W in the range of 87.5-108Mhz without tuning

Features:

- 25W output power in the whole FM band 87.5-108Mhz with only 1W input
- connects directly to our exciter - TX180A/TX190
- Broadband no-tune state of the art design based on MRF314
- Low pass filter for broadcast only where you want to and exceed FCC regulation regarding harmonics.
- new !! CNC drilled black anodized heat sink
- no additional heat sink required, only a fan is recommended for the case, two M5 screws to attach to your case easily.
- Optional adjustable output power 0-25W with on board trimmer or external potentiometer - AMP25WA ONLY.
- For power supply to drive this excellent amplifier see our Switching power-supply: 27V/2.4A with over voltage and under voltage protection, worldwide operation (110/220V)
